- Capacity: 100 L

Within the tank, pure water quality is preserved by two built in features:

- **Vent filter** – provides protection against airborne contaminants.
- **Automatic Sanitization Module** – with an integrated UVC regularly irradiates stored water and tank walls, preventing bacterial growth and biofilm formation.

Automatic recirculation of stored water through bactericidal UV lamp preserves water quality in the tank and ensures that high quality Type 2 (Grade 2) water is always on hand and ready to use.
